## SKILLS

React   Javascript   CSS   Tailwind CSS

Bootstrap   HTML   Node JS   Express

MongoDB   Angular   MySQL   C++   Python

## PERSONAL PROJECT

1. Youtube Clone
– I have built an app which is a high scalable video streaming platform. I have implemented debouncing in search. Also created live chat in youtube, handled data using web sockets.

2. Food Delivery App
– Architected a Food Delivery App utilizing React and JavaScript for the frontend. Enabled users to seamlessly browse and order food items, enhancing the delivery experience through intuitive and efficient functionalities.

3. Netflix Clone
– I have developed a large scale production ready application from scratch. It is all responsive, performant, and fast loading. I have used firebase for authentication.

## ACHIEVEMENTS

1. Member of the placement committee during graduation.

2. Volunteered as a Co-Head for a National Level event of ACM –Tech Tornado. 7

3. Member of the placement committee during graduation.
